Description

The New Account module will be used to create a new account for an existing customer. A Customer id is required.

Currently system provides 2 types of accounts:

- Saving
- Current

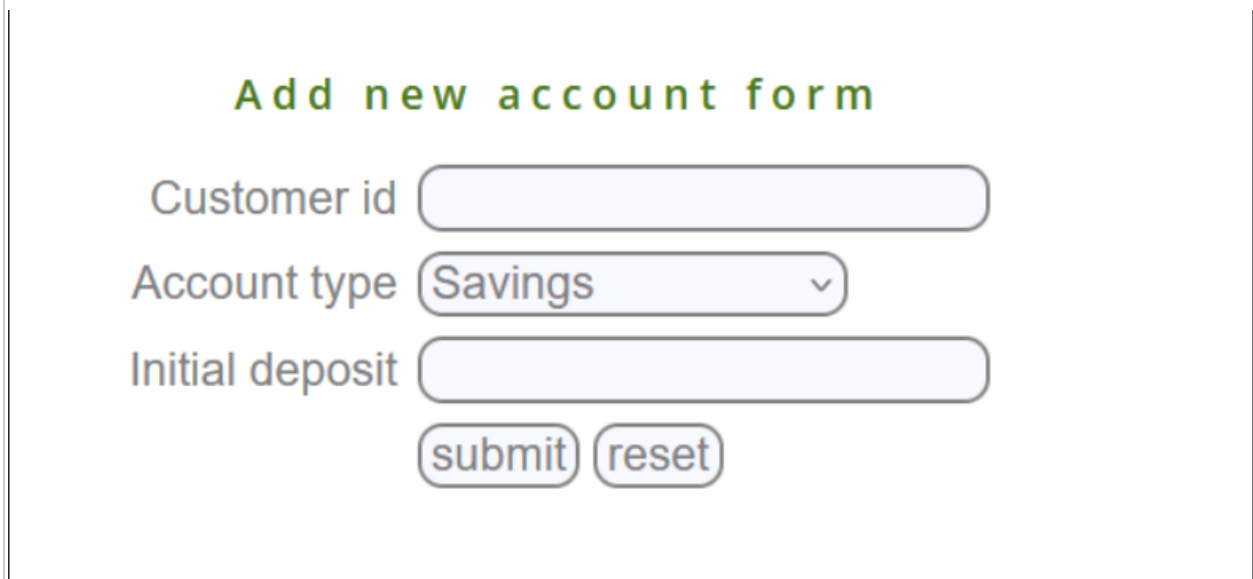

A customer can have multiple saving accounts (one in his name , other in a joint name etc).

He can have multiple current accounts for different companies he owns. Or he can have a multiple current and saving accounts.

The initial deposit must be 500 Rs or more.

Manager: A manager can add a new account for an existing customer.

The New Account module will look like this:

Add new account form

Customer id

Account type

Initial deposit

The technical requirements for the fields will be:

Customer Id - Customer ID is required

Customer Id - Special characters are not allowed

Customer Id - Characters are not allowed

Customer Id - First character cannot have space

Initial deposit - Initial deposit must not be blank

Initial deposit - Special characters are not allowed

Initial deposit - Characters are not allowed

Initial deposit - First character can not have space
